

Specification for Master Alloys

1 Validity:

These technical delivery conditions apply in addition with the orders of Master Alloys and the General Purchase Conditions of NEUMAN Group, for the form of ingots, powders, waffles, flakes, ...

2 Quality:

The supplied material has to be clean, grease-free, free of dross and coarse porosity.

Occlusions such as oxides, non-metallic impurities etc. must not deposit considerably on the metal guiding equipment and must not lead to any quality impairments in the semi products made from these.

The chemical composition must correspond to the details of the order.

For Changes in the manufacturing process that may affect the product quality, as well as a change of the production site, we expect communication in written form and in time, to plan and perform a re-sampling if necessary.

3 Designation

Clearly labeling of every packaging unit with the following designations:

- Supplier's designation
- Master Alloy designation
- batch number
- Net weight
- Gross weight

4 Packaging:

Disposable or euro pallets in water-protective packaging

5 Delivery documents:

Inspection certificate, delivery note, invoice and the required documentation for customs clearance have to be attached on every delivery and contain at least:

- Register number and order number
- Assignable weight and quantity distribution
- Test certificate (acceptance test certificate 3.1)
- Origin of the metal

6 Inspection certificate:

Inspection certificate 3.1 acc. EN 10204 must be present with the delivery and contain the following:

- the chemical composition
- Confirmation of compliance with EU Directives 2011/65 / EU (ROHS), Regulation (EC) No 1907/2006 (REACH) and End-of-Life Vehicles Directive 2000/53 / EC
- Confirmation of compliance with further legal requirements of the exporting country and the importing country, if applicable

7 Delivery times:

Monday to Friday from 6:00 to 14:00

If the listed items are not met, the delivery may be rejected.
